PHONOLOOK

Ecologici ed ecosostenibili

Ecological and eco-sustainable

L'utilizzo di **PET ad alto contenuto di materiale riciclato post-consumo** permette la re-immissione nel ciclo produttivo dei prodotti Phonolook di tonnellate di plastica riciclata che altrimenti andrebbero ad inquinare l'ecosistema. Questo aspetto legato alla circolarità dei prodotti e alla riduzione del loro impatto ambientale, insieme allo scarso utilizzo di collanti e adesivi nei processi produttivi che **riduce al minimo l'emissione di composti organici volatili (VOC) nell'aria**, rende i pannelli Phonolook la **scelta più ecologica** per garantire il comfort acustico negli ambienti interni in ogni ambito della nostra vita quotidiana.

The use of **PET with a high content of post-consumer recycled material** allows the re-entry into the production cycle of Phonolook products of tons of recycled plastic that would otherwise pollute the ecosystem. This aspect related to the circularity of the products and the reduction of their environmental impact, together to the very poor use of adhesives and adhesives in production processes that **minimizes the emission of volatile organic compounds (VOC) in the air**, makes Phonolook panels the most ecological choice to guarantee acoustic comfort in indoor environments in every area of our daily life.

Phonolook Design ECO

Una tecnica
di formatura innovativa.

An innovative forming
technique.

I pannelli **Phonolook Design ECO** rappresentano la più recente proposta di Eterno Ivica. Prodotti mediante una **tecnica di formatura innovativa**, questi pannelli di nuova generazione si contraddistinguono per l'**elevata eco-sostenibilità** unita ad **eccellenti prestazioni acustiche**.

Phonolook Design ECO panels represent Eterno Ivica's most recent proposal. Produced by **an innovative forming technique**, these new generation panels are characterized by **high eco-sustainability** combined with **excellent acoustic performance**.

Cucito | Sewn

Innovativo sistema a barra di rinforzo posteriore

Aumenta la resistenza alla flessione
dei pannelli garantendo
il mantenimento della loro forma
nel tempo e rendendo la posa in opera
dei pannelli stessi più rapida.

Innovative rear reinforcement bar system

This bar increases the bending resistance of the panels
ensuring the maintenance of their shape over time and making
the installation of the panels themselves faster.

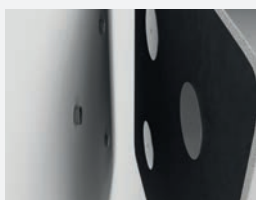

Sistemi di fissaggio Fixing systems

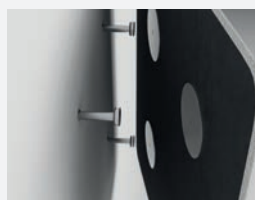

Kit baffle
Baffle kit

Kit cavi in acciaio plastificati
Plastic-coated steel cables kit

Kit calamite in aderenza
Adherence magnets kit

Kit calamite distanzato
Spaced magnets kit

Kit ventose
Suction cups kit

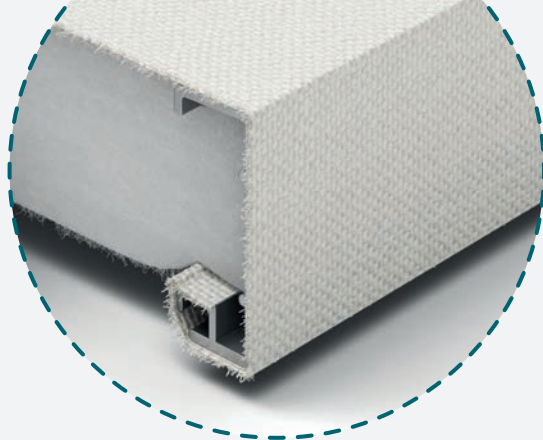

Kit anticorrosione
Anticorrosion kit

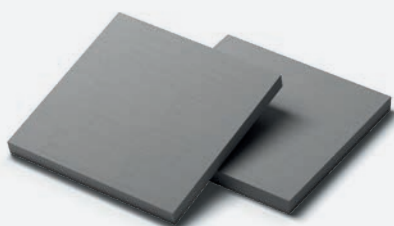

Phonolook Solution

Funzionalità e massima personalizzazione.

Functionality and maximum customization.

Fissaggio meccanico del tessuto
Mechanical fixing of the fabrics

Quadro

Da 600x600 mm a 1200x1200 mm
From 600x600 mm to 1200x1200 mm

Rettangolo

Da 300x1200 mm a 1200x1800 mm
From 300x1200 mm to 1200x1800 mm

Cerchio

Da Ø600 mm a Ø1200 mm
From Ø600 mm to Ø1200 mm

Phonolook Office

Organizzazione dello spazio
e comfort acustico.

Space organization
and acoustic comfort.

Quadro Plus
